SYMPHONY OF MADNESS

BACKGROUND OF THE BOOK

WHO ARE YOU? AND WHAT ARE YOU KNOWN FOR! WHAT IS THE PERSPECTIVE OF THE FOLLOWER OF THE FOLLOWED? AND ARE WE SUFFERING FROM MORAL BANKRUPTCY? YOUR MIND HAS BEEN MANIPULATED, AS A SYMPHONY OF MANUFACTURING ISLAMOPHOBIA HAS BEEN PLAYED BY THE LEADER OF THE WESTERN CHOIR IN ORDER TO DECEIVE AND DISMANTLE THE RELIGION AND SOW SECTARIANISM SO THAT IT DOES NOT REGAIN STRENGTH. THIS WAS DISCOVERED THROUGH THE RECENT JOURNEY AND THE MAGNIFICENT REVELATION OF THE CAPTIVE MIND AND ITS PROFOUND LOVE FOR THE ESSENCE OF THE SACRED BREATH.

WRITTEN BY

MR. FAISAL AL , JIZANI

Breaking away from the ordinary is either a sign of intelligence, foolishness, or madness. Madness is a state of disconnect or absence of the mind, a state of deep confusion, either a regression or a relentless pursuit without return. Passion leads to madness, love leads to madness, and undoubtedly, greatness

leads to madness that takes you beyond the ordinary. In popular imagination, art has been associated with madness, and the idea of a connection between mental disorders and art has become an absolute truth that makes it difficult to imagine an artist being sane and natural. It is as if it is obligatory for every determined mental patient to excel in some field. An ancient idea has emerged that links creativity and madness. Beethoven, Van Gogh, Salvador Dali, and Virginia Woolf, all these creators had troubled minds that unleashed their talents and energies, resulting in their greatness.

Beethoven, the creator of the greatest musical symphony known in human musical history, despite his father's alcohol addiction and abusive behavior that led to his deafness, also suffered from bipolar disorder, manifested as deep sadness or unexplained hysterical laughter, a disturbance in his hypomania. However, his musical contributions forever changed the world of musical notes. All this pain led him to compose timeless works without using his ears, making him the king of notes for eternity. Creativity and madness are genetically intertwined. Science has attempted several times to delve into the common link between creativity and madness, and the results have been astonishing. For example, in a study published in 2015 in the journal *Nature*, after examining genetic data from over 15,000 individuals, researchers found that those working in the field of art and creativity were more likely to carry genes that make them susceptible to mental illnesses compared to those working in non-creative professions.

In a study conducted by the Icelandic biopharmaceutical company GENTICS DE CODE, after analyzing data from 86,000 Icelanders, it was revealed that individuals working in artistic professions were 17% more likely to have genetic variations associated with bipolar disorder compared to the general population. In a comment by the CEO of the company responsible for this research, Kári Stefánsson, he said, "To be

creative, you have to think differently, and when we are different, there is a tendency to be labeled as strangers and fools".

Art has always been a safe haven for the troubled, with its power to rescue artists from the vicissitudes of life. Creativity has often been the only means for many to silence the pain that cannot be spoken or explained. As Dr. Ahmed Akasha says, "Most creative individuals are mentally ill." Faith frames creativity and protects the patient, as Islam is an effective remedy in solidifying beliefs and the role of worship, a spirituality that has amazed and continues to amaze hospitals around the world.

Perhaps this book is my tenth symphony in a series of books and novels that I present to you, the possessor of musical ears, sensitive senses, unique taste, and captivating distinction, and a imagination beyond nature. In life, there are things we agree on, things we contradict, and things we must part with. No one will sing to your tune, but you can sing to someone else's tune to open their ears to you. Good orchestra players play a good musical piece with passion; its genre distinguishes its acceptance, engagement, followers, and glorification.

The term "symphony" (SYMPHONY) derives from two Greek words: "SYM," meaning together, and "PHONE," meaning sound. The combined meaning is "collective chanting," which is the result of my composition to express the truth. It was said long ago, "If time does not obey you, you must obey it." I say, ride the wave and climb the mountains, plant your flag on their peaks, let it flutter, and in your hand is an Oscar that surpasses you, given to you by its creators for your distinction and inspiration. If you don't play, others will play for you. Either listen or dance, and if you have a mind, you will cry, or you can start playing to guide and illuminate the path and captivate the hearts that have been disturbed by falsehood. We are nothing

but experiments from which we learn to avoid mistakes that have been made before.

This was an excerpt from the Symphony of Madness. Did its melodies resonate in your mind? Perhaps it is similar to Sergei Prokofiev's Symphony (Dance of the Knights), but it carries a love not for Juliet but for saving humanity and pleasing the Creator. You had the right to it, like the moon on the fourteenth night, not the order of the symphony (Dance of the Knights) for the brave who do not easily surrender and play in the grandeur of classical music, inspiring the lost and those seeking the verses of truth, not falsehood. The maestro of truth is not desired, but the flock loves to dance, and great nations have a friend in the past who becomes an enemy today when interests end

Has the blind imitation of the West dominated Arab and Islamic societies? Aren't our societies educated enough and equipped with technology and electronic advancements in civil transactions and e-services? Or have we been influenced and worn garments that don't belong to us? In a certain era, European intellectuals used to incorporate some Arabic words into their speech as a sign of being cultured. Indeed, this reflects the credibility of the Prophet Muhammad, peace be upon him, when he said, "You will certainly follow the ways of those who came before you, inch by inch, and step by step, even if they enter a lizard's hole, you will enter it too." They asked, "O Messenger of Allah, the Jews and Christians?" He replied, "Then who?" This hadith is a warning against imitation.

Recently, we have witnessed strange phenomena among our youth who travel abroad outside our Arab and Islamic countries. It is not wrong for us to acquire beautiful customs from other cultures. However, imitating in clothing, nudity, and abandoning modesty is heart-wrenching and brings tears to the eyes. We do not deny that every country in the world has beautiful customs that deserve recognition. Islam acknowledged good customs

during the era of ignorance and encouraged good manners. How wonderful it would be to travel around the world, countries, and cities, and adopt the best customs to create a higher example for humanity in Arab and Islamic countries that lead the future towards noble ethics that befit the human being, who was honored by God above all other creatures, out of respect for humanity, existence, and the noble etiquette of Islamic interaction, which transcends all pretentious claims of human perfection and respect for others through actions, not just flashy slogans and dark propaganda.

The moral bankruptcy has captivated the words of my pen and inspired it. Are we losing our Arab identity and Islamic values to become clowns in the hands of fools and the ignorant? Or do we not know the value of our authentic Arab and Islamic heritage? Islam refined Arab customs, solidified the most beautiful aspects, eradicated their old fallacies and corrupt beliefs, and established noble ethics, encouraging their practice.

Freedom is called for, and expressing opinions transparently is cherished in advanced countries. They believe everything they see is correct, while the opinions of others do not concern or matter to them. They claim to fight against racism, yet it is prevalent among them. The escalation of hatred in their discourses has become evident, targeting specific ideas, currents, or religions, unveiling the veil and exposing the false mask that has deceived us for so long.

Everyone who fought Islam eventually embraced it, and anyone who sincerely searched for the true religion and sought it from God turned to Islam and found their guidance, tranquility, and peace in it. We have given our minds to others and entrusted them to international educational institutions and their media, which now lead us and solidify our beliefs as human beings. Mr. Remy, a French coach who trained me, said to me, "How

beautiful is your country and how beautiful is your religion and beliefs." I replied, "Then why didn't you embrace Islam?" He said, "You open the gates of hell for me." I asked, "Why?" He replied, "I have a Christian education, and if I embrace Islam, I will lose my family. I will be ostracized, and I fear that".

They have manipulated their minds, if they haven't already sold them, through blind imitation and weak reasons that may seem important to them. Here I say, if you sincerely seek religion, regardless of your faith, God will guide you to it without the need for anyone to assist you in knowing it. For Allah, in His greatness, has given us minds to think with and know the answers. The one who creates airplanes, spacecraft, and satellites is capable of knowing religion if they give themselves time to search for it. Every person is naturally inclined, so if a person is left without a religion, they would choose Islam on their own.

The West has known what Islam is, and they have recognized it as the true religion. So, they planted Islamophobia in their societies, portrayed Islam in the ugliest images, fabricated accusations, and produced movies to distort it and present it in a repulsive and hated terrorist image. The West does not want a moderate Islam because that would make the world embrace it. Instead, they want an extremist Islam to combat or secularism to detach from and abandon the religion. The West has a phobia of the spread of Islam, which has led them to support fabricated and distorted religious factions and export them to the Islamic nation as if they were part of it, in order to portray a negative and repugnant image of Islam. These practices have been in place for a long time. Western interventions that emerged during the era of imperialist colonization in the 19th and 20th centuries have had an impact on Muslim-majority societies, reinforcing extremism and undermining trust in religious heritage.

In our era, Clinton himself confessed, after his statements of Western support for ISIS and Al-Qaeda, that they recruited them

under the flag of Islam and deceived the world with it. However, anyone with basic reasoning abilities can figure out who funds them: the type of cars, the type of weapons...

Show all of these different forms of Islam and their relationships with the liberal West. Two concepts have emerged: extremist Islam and secular Islam, both of which have had an impact on Muslim and Arab societies in general, and particularly on ethnic communities. These concepts differ from moderate Islam, and thus there are reasons behind the historical animosity between Islam and liberalism .

Extremist Islam represents an extreme and biased interpretation of Islamic teachings, where extremists consider anyone who is not following their faith as apostates, viewing them as infidels in their perspective. This is due to their strict interpretations and literal readings of Quranic texts. They resort to violence to enforce their beliefs, and they have followers such as ISIS. The Western world associates this concept with Islam, as they attempt to portray a negative image of Islam and its followers as savage, engaging in unjustifiable acts of violence. European inquisitorial courts, which are no less horrific, relentlessly pursue thinkers who live in a world that does not wish to discover the truth and loves deception. In the 11th century, out of fear of the spread of Islam and the fear that thinkers would find their Lord and realize that Islam is the true religion, the Catholic Church pursued those known as heretics. They defined heretics as anyone attempting to harm the Christian religion, and the mission of these courts was not to punish people, but to reform the Christian religion and bring the lost back to true faith. These are the Christian extremists. Every religion has its enemies, and after a long series of massacres and the St. Bartholomew's Day massacre that killed many Protestants, Christian secularism began to emerge. This is the beginning of understanding the concept of secularism, which is also the case in Islam. All of this is intended to change the foundations of

religion and produce conflicting societies that are easier to control.

The beautiful and sad thing at the same time is that the curtain has become transparent to the point that we know everything. The acting and alleged lies have ended. Through the world's visit to the 2022 FIFA World Cup in the Gulf, the world recognized our culture and that we are peace-loving and respect humanity. They have fabricated stories about Islam, and their media will exploit them to tarnish the beauty of Islam and Muslims. They have not only faced moral bankruptcy but also human bankruptcy (stripping away humanity) with a global financial system that perpetuates poverty and deprives developing countries of progress. No matter what religion one follows, no person of sound mind would tolerate the humiliation of their fellow humans. Your religion does not concern me, and I will not enter paradise if I do not follow my religion, nor will I enter hell because my followers follow your religion. Respect for humanity is a human demand for the rational, and all of this is far from the political interests of directing humans.

In Qatar, our Gulf culture and the way we dress have impressed them. We respect humanity without lying, without masks, and without hatred towards anyone. We value good manners, eloquence, and hospitality. This has changed the perception of those who attended the World Cup in Qatar. Visitors were amazed by the IFLA Library, Qatar National Library, and many other beautiful things that showcased the true image of Arabs and Islam. People from all over the world were shocked by the warm welcome and generous hospitality they experienced, which is known in Arab and Islamic cultures.

Many bought traditional Gulf clothing, such as the Shemagh, and admired the Arab and Gulf styles. They did not find the false Islamic phobia but instead embraced Islam. This worried the enemies of Islam and disturbed them. Arabs are known for their strong family bonds and social connections. We prioritize

family unity and community cohesion. Western societies, on the other hand, have low levels of social connection. It is common to find individuals who haven't spoken to their mothers in months or even years. The elderly in Western societies often lack care and consideration. In contrast, we in Islamic societies fulfill our duty towards our parents, as it is a basic right they have as Muslims. Some elderly people were impressed by this and were drawn to Islam because of the rights Islam grants to parents and family members. In Islam, the rights of humans are protected, whether they are a father, mother, brother, sister, friend, neighbor, or anyone else. Islam is a blessing, and it is not limited to the land of the Two Holy Mosques. Prophet Muhammad (peace be upon him) is a prophet for all humanity, not just for Arabs.

Muslims, regardless of their identity, nationality, or city, are not obligated to imitate others. Differences should be for acquaintance, not for conflict, division, or discrimination. You are not obliged to imitate anyone in order to gain their approval or respect. Know that only those who are the best are imitated. The Messenger (peace be upon him) completed the religion, and Islam encompasses freedom, civilization, and progress. Civilization is not only about technology but also about the happiness of human existence and dignified interactions. If we don't love one another, no one from the outside will come and love us. I will not replace my brother, betray him, or seek his mistakes. I do not wish ill upon him, and I do not want to work against him while he stands by my side, always trying to help me succeed in my endeavors. It is the duty of a Muslim to assist his fellow Muslim, and the Kingdom of Saudi Arabia leads the way in helping Muslims and others in need. It extends its white hands to the whole world.

The myth of the Western flags has been dispelled after hosting the World Cup in the Arab Islamic country of Qatar. This country, with its Islamic and Arab identity, shattered the barbaric perception that the West had of Arabs and Muslims.

Foreign tourists used to associate Arabs and Muslims with tents, camels, weapons, and supposed terrorism. This was nothing more than the fabrication of Islamic phobia to sow hatred in the minds of the world towards Islam and its people, portraying it as a backward, retrogressive religion that contradicts civilization, progress, and human rights.

British presenter Piers Morgan, after witnessing the reality on the ground, expressed his frustration with the truth, saying, "Here in Qatar, the tournament is nothing like what is being promoted in England. Fans from all over the world are living in safety and happiness." He also acknowledged that the Middle East deserves the World Cup and that the Gulf countries are doing a great job. He further questioned our moral position to lecture the Middle East about laws or values while we invaded Iraq twenty years ago, igniting terrorism for more than two decades. Furthermore, he pointed out that in last year's UEFA European Championship, we showed the world that we engage in drug use, alcohol consumption, and brawls. This is merely a reflection of Islamic and Arab behavior in dealing with street matters during the World Cup, highlighting the generosity of Islam, which cannot be concealed, through their hospitality, cleanliness of food, excellent treatment, and genuine security enjoyed by the Arab Islamic Gulf countries. These qualities were portrayed by the Western media in the worst possible light and with the filthiest descriptions.

We celebrated the exceptional organization of the World Cup and shared the joy with enthusiastic fans from all over the world. Andres Cantor, the chief commentator of the World Cup at Telemundo Deportes, broke down in tears after his country, Argentina, won against the French national team in the 2022 World Cup finals in Qatar. Sheikh Tamim bin Hamad expressed his congratulations, saying, "I congratulate the Argentine team on winning the 2022 World Cup in Qatar, and I also congratulate the French team on their runner-up position. I thank

all the teams for their wonderful performance and the passionate fans who supported them. With the conclusion of this tournament, we have fulfilled our promise of organizing an exceptional championship from the Arab lands, providing an opportunity for the world to discover the richness of our culture and the authenticity of our values." His special recognition of the Argentine team reflects the generosity of the Arab people and their love for the peoples of the world, debunking the lies propagated by the Western media for decades about their own people. Previously, the Western world only knew Arab countries through Dubai, and both Arabs and non-Arabs adore this illustrious city and its genuine Emirati hospitality and advanced technology. Some foreign stations extensively covered the World Cup, displaying a great openness to others and pride in Gulf identity. This is evidence of their humanity, love for humanity, openness to others, and coexistence of nations, forming a human unity and bond because we are all descendants of Adam. The West did not like this because it undermines their efforts to distort Islam, manufacture Islamic phobia, and expose the lies based on the barbaric mentality propagated by the Western media. This has served the Zionist entity occupier in various ways to silence the world and prevent international organizations from dealing with it or demanding its expulsion from the occupied Palestinian territories. The occupying entity became fearful after the World Cup due to the exposure of those lies and claims, playing the role of an international victim.

The whole world witnessed Islam in Qatar, prompting a group of Jewish settlers to request departure to the United States out of fear that the world would unite against them, just as the world stands against Russia at the expense of Ukraine. Either the world supports Ukraine or the world starves, with no wheat to sustain life. This is a cheap approach, as we are against the occupation of any country, and it is the right of all peoples to live in peace. Does the world really stand against the Zionist entity, planting humanity anew and upholding human rights based on truth, not mere claims?

Furthermore, the West continues to manipulate the ignorant in Arab and Islamic countries to achieve their destructive interests by fostering terrorism, destabilizing those nations, and exploiting the name of human rights. Moreover, the deep state that governs the world in secret calls for abandoning any religion, aiming to distort human thinking and make individuals believe that they are gods themselves, denying the existence of any supreme deity. Hatred towards religions has been cultivated because they sow animosity among people. Sadly, some of the current generation, including educated individuals, have been influenced by this and only seek pleasure and amusement without prayer or worship. Some even argue that prayer is unnecessary, emphasizing the importance of being kind and treating others well. They completely detach themselves from the essence of religion. This is due to the intellectual invasion of social media, where their minds have been penetrated as the devil desires. It is said that Prophet Moses encountered the devil, and Moses said to him, "I seek forgiveness for you, and God will forgive you because He is forgiving and merciful." The devil replied, "Ask your Lord to forgive me." Moses then said, "O Lord, forgive him." So, God commanded Moses to let the devil go to Adam's grave and prostrate to him, and if he did, God would forgive him. Moses returned to inform the devil, but he responded, "I will not prostrate to him while he is alive, let alone when he is dead." Therefore, do not believe that the war with the devil has ended until you meet your Lord and discover the truth that all prophets have conveyed, that the devil is an enemy of humanity.

Now, let's turn to what happened at the World Cup. It was heart-wrenching to see Sheikh Tamim bin Hamad imitating the Argentinian player Messi by wearing the traditional Saudi robe (thobe). Western media outlets were furious with him, claiming that he committed a terrible mistake. They fail to understand that wearing the thobe is a symbol of honor and respect in Arab culture. Gary Lineker, a sports analyst at BBC, shamefully criticized the coverage of Messi's shirt during this magical

moment. We say that the real shame lies in his explicit racism and his ignorance, which can only stem from someone who has lost their humanity. He views humans with disdain and does not comprehend equality. Humanity means respecting brotherhood in Adam, regardless of color, religion, or appearance that would make me adopt a condescending or racist perspective or engage in baseless discrimination without deceptive propaganda that serves a satanic agenda to destroy religions and control nations through shallow chants that deceive those influenced by racism.

Similar to the theory of the "White Man's Burden" claiming to be the educator of humanity, they manufactured the Islamic phobia in a repugnant manner rejected by human intellect. This is what they sought after the rise of Islam and its spread, as well as the eras of the Renaissance, the suppression of knowledge, the flourishing of Islamic civilization, and the beginning of Christian secularism, along with the fear of the Arab world's geographic position. They fabricated Islamic phobia by planting corrupt sects and beliefs that have no connection to Islam, such as the creation of the Qadianism movement in the past .

In our time, there are groups like the Daesh, who represent different kinds, to demonstrate to the world that this is Islam. They gradually achieved this by dividing their countries with the flags of selected nations and by officially drawing and dismantling borders into small states. They worked at that time to eliminate the ideas of these sects and corrupt beliefs in education within the targeted countries, to implant studied and regulated radicalism, and to discredit Islam to Western thinkers in order to fight Islam by tarnishing its image and making it a religion that generates terrorism. They wanted to understand the power and impact of this religion on its followers after experiencing the downfall of the Soviet Union at the hands of Muslim militants, who made them feel the danger, strength, and truth of this divine religion, like other revealed religions. This incident led the West to begin studying the religion and the life of the Prophet Muhammad, peace be upon him, in detail,

something they cannot match. When searching for Islamic religion on search engines, you find Western websites that provide detailed information that you may not find in your references sometimes. The funny thing is that you can even obtain a religious doctorate from them. Let's be foolish enough to respect every human being's right to respect, but the 2022 World Cup revealed many things. The absentees from the nations that attended in Qatar discovered the falsehoods and lies propagated by the Western media about Islam and the Arabs. No Western country possesses them in the same way as in the Arabian Gulf. They did not find terrorism, the manufacturing of death, or the intimidation of Islam and the Arabs. The Arabs have the purest hearts, and there is a rare Arab culture of hospitality, assistance, and genuine feelings without pretense or fabrication. Some European countries complain about Arab communities and the crimes committed by them, but this is what your own hands and thoughts have created from the sectarian divisions mentioned earlier and from the colonialism that these countries have experienced. We did not mention specific countries because we respect the people in them. This is only the work of planners and propagandists for the Western media who do not know the truth. Western societies are purely media-driven, and they believe everything that is said and published. Here, I say that we Muslims have been marginalized and divided into sects that have no connection to Islam. There have been attempts to detach these sects from Islam through purely satanic methods. We are still fighting each other due to foolishness, ignorance, and aggression against one another and against our true religion. There is no divine religion, ancient or new, that permits the killing of a soul. Even terrestrial laws do not allow Killing a life. So, what about these people who do not understand a simple saying?

To judge this life, one must break free from the structures imposed by educational institutions. This applies to many institutions worldwide, where they enforce upon you a religion, a way of thinking, and laws that were not chosen by you, the individual. If someone grew up in the West, they would be

Christian or Jewish according to their parents, and the educational institutions in their country. In the East, they might be Buddhist or Hindu according to their parents and the educational institutions imposed on them. If someone is forced into a certain religion by their upbringing, is it possible for them to be born and choose their own religion, beliefs, and thoughts? This is the difficult question for which you will not find an answer. And if you try to challenge these customs, you will be fought by those around you who share the same background.

Dr. Mustafa Mahmoud contemplated this, and I am not defending his ideas in their entirety. He became an atheist. Omar (may Allah be pleased with him) said, "By Allah, you will not know Islam until you know ignorance." If a person breaks free from the constraints of religion and education and seeks the true religion, they will find Islam to be the true religion, the correct Islam, not the distorted version sent to different parts of the Islamic world to sow sectarianism. It has been manipulated and distorted from within and outside by those who received the packaged version. They cast doubt on their neighbors, fabricate lies, and sow division among the people of the same household, whether they are from the Gulf, the Arab world, or the Islamic world. This has made us distrustful of anyone, not just those close to us but also those far away. And this is what they want.

Here, a pause is needed to occupy the enemy with their own interests, expose their lies, and export what they have sent to us back to them. This was a difficult piece of music to play, and it deeply moved me.

The idea that a person does not follow a religion imposed upon them will place them in a position of great worship (please read carefully so as not to misunderstand like Dr. Mustafa Mahmoud, and please understand the idea before speaking and judging). The divine breath that God blew into Adam made the universe

subject to him. If a person is left without a religion, they will create a religion to worship God. This is because humans are inclined to worship their Lord, and a human cannot live without feeling the security of the Lord who created them. This is what I call the great worship, where a person recognizes their Lord and engages in contemplation, leading them to reflect on the creation of God and His greatness. This enhances the activity of the mind and does not rely on indoctrination, which is used by the followers of Satan and condemns the one who practices it by all available means. It becomes detestable to those around them or through various methods that will be discussed later.

In order to know this, one must embark on a journey of knowledge about the true religion of God. This has led many people, including Westerners, to discover the true religion and embrace Islam. Every person must ask themselves why they exist in this universe. Did we come into being by chance and from nothingness?

I was fascinated by a story about a Muslim man's encounter with an atheist. The Muslim promised to meet him, but he was late, and there was a river between them. The atheist said, "The Muslim hasn't come yet, which indicates that his religion is false and that there is no religion." However, after an hour, the Muslim arrived. The atheist asked, "What caused your delay?" The Muslim, trying to match the atheist's intellect, replied, "I couldn't find a boat to take me to your side. Then a lightning bolt struck a tree, which fell into the river and broke apart, turning into a boat, and another tree branch fell and became an oar. I boarded the boat and came to you." The atheist responded, "Are you mocking my intelligence? Such a thing could not happen without a boat maker." The Muslim asked, "Are you angry because there is no boat maker? But you don't hesitate to believe that the universe has no creator?" The atheist was shocked, and the Muslim said, "The debate is over," and left. The witnesses to this conversation embraced Islam.

The human being knows that the universe has a creator by reason, not through education or the pouring and implantation of ideas and their imposition. God created your mind not for rent, but for thinking. So don't give your mind to others for them to think with it or to be led by others along with the herd that destroys humanity and exploits it in the ugliest ways. They have created drugs that are not like the drugs that were made in Germany to keep the army awake and fighting without a mind or honor. Rather, the drugs they have made are intended to fight against yourself, your country, your religion, and your honor without any honor. They have even started sending direct messages on the bohemian concept and plan that serves the devil, just as the devil helped Nimrod to rule the world. It is served through the bohemian executors, and they have made ice, or what is called "shabu," for the purpose of rapid self-destruction of the user in order to strip away all aspects of honor and values that a free human being possesses. It is used to make a person descend into extreme degradation that alcohol and pork consumption could not achieve in years, but "shabu" can achieve in a short time. Let us now talk about pork. It has been forbidden for Muslims to eat it, and the question is why? The answer is that all animals eat plants and meat from predatory animals except for the pig because it was created as the animal

vacuum cleaner for waste. So how can I eat an animal that eats waste? Does my mind exhaust itself to the point that a person has to struggle to find a good restaurant to eat in? Some humans willingly eat filth, and there is a religious justification that eating pork removes a man's jealousy over his wife, daughter, mother, or sister. If your jealousy is not like that of a horse, then the inside of the earth is better than its surface. Let's go back to the main topic of our discussion: drugs that were made to destroy nations. There is no need for fighting if humans are exploited by deadly drugs that remove their jealousy over their own honor or that of their families. Only those who do not care about their country and themselves use them after what we have said. I am not one who believes in conspiracy theories, but there are those who believe in them. In the following picture, the drug "shabu" is made into sweets and given to children, and notice that they are in the shape of an owl. The owl symbolizes bohemianism and conspiracies that are plotted against the whole world, and it is exploited for marketing purposes. There are things that happen by pure coincidence, and they try to plant doubts in you, which in itself is destructive. What matters to us here is the protection of our children, our Islam, our beliefs, and our homelands from the introduction of ideas that sow doubts in religion. This has indeed begun gradually and in a despicable manner in convincing the gullible to undermine the noble speech and to criticize the imams, the righteous, and the scholars and their followers to cast doubt on religion. Religion refers to God and His Messenger, not to individuals. It is new to question the Quran about the forgotten and abrogated verses, and we see fools applauding with all their might to open the door for the devil. The verse regarding preservation is preserved along with what follows it, and the Prophet, peace be upon him, recited: "This day I have perfected for you your religion and completed My favor upon you and have approved for you Islam as religion" [Quran 5:3]. It was revealed during the Farewell Pilgrimage on the day of Arafah, and the Messenger, peace be upon him, passed away approximately 90 days later, according to my father and mother. The tragedy is that the number of

jurists and those who dare to issue fatwas has increased, and seeking permission for it has its conditions. The project of destroying Islam and spreading deviation has been ongoing for 1,400 years and is not a recent development. The strange thing is that those who debate with you about religion, if you were to ask them about their relationship with prayer, do they memorize anything from the Quran or Hadith? Do they have knowledge equal to the knowledge of The men in Hadith?

•He will ask you about knowledge, but he possesses no knowledge or religion, yet he debates you about matters he knows nothing about. Indeed, hadith studies is an extensive field of knowledge for those with experience in it. Some ignorant ones say this is permitted and that is forbidden in a time when right and wrong have become convoluted and disasters are exported from everywhere - from trivial matters and those who fall victim to material possessions. I found open minds receptive to receive, circulate, and promote them under the pretext of openness, fake culture and empty modernity. That comes from love of this world and inclination towards the earth as well as a claim of science, knowledge and gross intelligence which has brought vulgarity in speech and action. So I do not call to the revivalists nor do I call for dissociation, for moderation is the demand of balance. Freedom brings out the best in you, not the worst in you. Later I will speak about Andrew Radice and how he says that Islam is a correct religion, system and belief. I remembered the saying of Amir Al-Mu'minin Umar ibn Al-Khattab, may God be pleased with him: "By God, one does not know Islam until one knows pre-Islamic ignorance".

The human mind is that great computer and that mighty server that generates cosmic energy over 24 hours through an endless storage process. The child comes to this world as the product of a relationship between two spouses, meaning a male and female, like the new computer with its giant memory, large RAMs and mighty power beginning the activation of this mind and its preparation within the incubator, which is the mother, during her

pregnancy period where the fetus can distinguish sounds after the formation of ears and their annexes in the brain. Glory be to the Most Creative Creator. The infant descends from its mother's womb to the universe and enters the great stage of reception during childhood, which is the stage of information collection to be able to communicate with others and acquire habits and traditions existing in that part of the world. It did not originally carry any identity, religion, beliefs or ideas - neither good nor positive. These are planted through learning and education. Learning is gained through experiences interacting with parents, siblings, neighbors, relatives and education is through the institutions existing in that country. The process of indoctrination with the ideas and beliefs of that part of the world begins, carrying the religion of its parents and the traditions of its family and society it inhabits, then it adopts the ideas dictated to it by the educational institutions in that part of the world. Thus, its beliefs, ideas and aspects it likes and dislikes are formed until it becomes a brick in the structure existing in that part - not voluntarily but imposed on it because it was born in that part of the world. And the innate characteristic of worship that God planted in His creation remains, which is worshiping Him. If its parents carry a specific religion, it carries it by following them and feels reassured by it. There are sciences in life that have no basis of truth but only aim to reassure man and settle him. A person is only convinced by understanding the thing, not God, who created Adam with knowledge of all names (And He taught Adam all the names), and all of them mean Adam was knowledgeable, not as some civilizations portrayed him as backwards and primitive. We are scientists by nature and the universe is enslaved to us and in our service, so our beliefs and thinking command the universe, and that which is not taught to you but rather discovered by yourself, and that is by the breath of God who enslaved the universe to serve the children of Adam, and you say not with your self but with your soul that everything you ask about, you can find answers within yourself. For man is the inventor of everything because (he is) knowledgeable

And after all of this, you will learn that you do not actually hate a specific religion or society or traditions, but rather they were planted in you during the phase of shaping your mind. If you free yourself from the vat of pre-stored impositions in your mind, you will be liberated and see the world in a different way without bias towards a specific belief or religion. In this stage of maturity, you will look with the true humanitarian eye and know that we are just machines that were equipped without prior choices or knowledge or consent, and this contradicts humanity .

You most likely love a people because the people around you love them, and you hate another people because the people around you hate them. Free yourself from these delusions and nonsense that do not befit a person carrying this mighty enlightened mind. Let us venture into the world of truth hidden by the devils, and here I mean the human devils before the actual devils who do not want you to enter Paradise and have distorted the religions sent by the Lord. Perhaps someone will say here: Why don't we free ourselves from enslavement to the Lord? And the philosophical answer to this is that man cannot live without that belief, even if man is left alone in a place with water, he will ask: can I build a house for myself! So who built this universe for me! All sciences lead you to the Great Creator whom you want to search for and worship with your inner nature .

Human intelligence is the highly skilled mental ability related to the power of learning, understanding, thinking, analyzing, measuring, comprehending and problem-solving, and language. If we place children on an island with no communication with anyone, they will invent a language to communicate - this distinguishes humans from other creatures, and not primitive communication like animals. The human is distinguished by his mind with its complex cognitive functions. His high level of awareness and motivations can create the impossible. One of the amazing human acts is contemplation, as it opens the horizons

of thought and unleashes creativity in the path of invention and innovation .

It is unfair for us to surrender our minds to others to see our future; what is done is manipulation of the mind, for example, I tell you: do you want lunch at two or one? You think you chose the time, but in reality you were given a choice where I am the one who gave you the time for lunch. If you chose one o'clock, you chose what I dictated to you, and I gave you a space you feel is freedom, but in reality you are restricted by the time that was set for you - gauge this against life in general. Islam came to liberate man from enslavement to his lusts which may lead him to perdition, as Islam gives him the stamp of man in which lust and knowledge are combined in a way that serves him correctly on the right path without depriving others of their rights or assaulting them, and this proves that this religion is great, as it is the last of the heavenly religions .

When a man looks through the perspective of another religion, his previous programming prevents him from accepting the beliefs of an outsider, because his mind resists that. The thought of that religion and belief has been entrenched in the depths of his being, and it is difficult for him to get rid of them by completely deleting the whole system and reloading new ideas and beliefs. However, residues remain, which are like files carrying viruses not completely eliminated. When the device is new, its absorptive capacity is high, but over time this capacity decreases with obsolescence. If a person is able to reformat, delete and cancel all applications, he is able to absorb anew forever. Every human has the right to enjoy his personal identity loaded with his beliefs, not what was pre-programmed for him, but rather what he himself believes with pure intention. And it is dangerous if he is left without programming, he will stray and stray outside the flock .

A human must learn then follow the beauty of things, meaning follow the most beautiful of what exists in self-love, love of those around him and love of his humanity, then head to search for truth through the search for the quest for truth and the correct religion. A human must not surrender his mind except with will without making doubt an issue for us. Many humans have previously searched for the truth of the world and of this brief journey that will one day end in death. After Adam tasted from the tree mentioned in the Quran, and Christians say he ate the apple brought by the serpent when he was in the form of a snake, and the stories are similar in holy books, and the idea is the same - the serpent seduced him. In the end of the preserved book, which is the Qur'an, it is a tree without specifying it, and the witness here is that it became incumbent upon man to taste pain and death, while in Paradise he did not know pain or death. By eating this tree, he must inevitably taste pain and death. If one was to be saved from it, the prophets and messengers would have been saved, but all the children of Adam will taste what God has decreed for them

Life is a journey and there are questions about the last journey or walk, and they live humanity, love, mental peace, and love of humanity - it is a walk to the final stage in the journey of life. You will learn and learn that all you see is not the truth, and the matters you were ignorant of will be revealed to you and you will become more mature than before .

A question revolves in the mind: what comes after all this life ?

Have you died before this ?

Who can tell you what comes after death?

Is death painful?

Is this life worth all this trouble?

Do our minds belong to us or to others ?

Where are we going?

Why do humans pilgrimage to Mecca, the House of God, for thousands of years?

Can lies live for 1400 years ?

Is Muhammad the last of the prophets mentioned in the holy books?

Why all these books and prophets and what is the essence of the war against the devil?

Why envy (the evil eye), malice and sorcery? And why is there pain in this life ?

Is there a savior, is he a man, a religion or a god to be worshipped?

Why all this life of hypocrisy, lies, deception and fabrication of facts ?

Is there truth and do people love each other?

Why do we hate those who do not resemble us in appearance, belief or place?

Does man have value ?

Why don't we respect each other?

Heavenly religions, earthly religions (man-made), atheists who do not belong to any of the above, and people with wealth !

They own the sky and earth, and yet their main concern is a loaf of bread

This is mere primitive awareness without reason !

Is man so cheap?

Is the punishment after death what makes us die to obtain it ?

Are we naive ?

What is your share of knowledge?

Is the truth lost? Or are we the lost ones?

We have been honored over all creatures, and everything has been enslaved for us, and we were promised and not others within our knowledge .

Yaran Van Klaveren's journey is one of the most enjoyable journeys - he embraced Islam after becoming a politician to oppose Islam and expose their lies later on. He studied comparative religions at university. "I used to think Muslims were insane and their religion was not real, and my hatred of them increased after the murder of filmmaker Theo Van Gogh, who was murdered in the street trying to cut his neck and with a knife embedded in his stomach by one of those carrying the Islamic religion, increasing my resentment of them, so I decided to write an anti-Islamic book exposing their evil " .

"In the beginning, I started comparing the concepts of Christianity with the concepts of Islam, and I had doubts about the trinity, and in Islam is the oneness of God, which made me believe reason and logic, and it is the logic found in the Old Testament of Christianity and I adhered to the one Lord... which made me appreciate Islam and enter it after comparing Moses, peace be upon him, with Muhammad, may prayers and peace of God be upon him, and the story of Muhammad's, may God's prayers and peace be upon him, wives with the wives of King David, peace be upon him, so he had many wives .

Abdul Hakeem Murad advised me that if you want to know a religion, start by reading their religious books from the best of them, then the other religion from their best, then compare. So I read about the story of Hamza the Prophet's uncle, may God bless him, and that he was killed at the hands of Hind who later became Muslim, but the Prophet did not kill her despite her mutilating Hamza, may God be pleased with him, and this is the characteristic of the great. So I began to believe in his prophecy .

I now believe in the oneness of the Lord and now I also believe in Muhammad's prophecy. This is the testimony. I stopped and said let me leave this nonsense and lifted the book to the top shelf and many books fell on me and it was the Quran that shocked me and my hand was on the page of Surat Al-Hajj, verse 46 which says (It is not the eyes that grow blind, but it is the hearts which are in the breasts that grow blind) I said swear to God, it is vanity that does not allow me to accept the truth, so I became Muslim the next morning ".

He advises reading the book Muhammad: His Life Based on the Earliest Sources by Martin Lings

I remembered myself when I spent four years reading the scriptures in the gospels, the Gospel of John and books of heavenly and earthly religions, because surrendering the mind to humans is a great danger. The Lord did not create you with a mind to obey others, and He did not honor you over all creatures except with this mind, so use it. Each of us has a journey to know the Lord of the Worlds .

The story of John Fontaine and how he embraced Islam - he was a professional jazz singer, saying: from singing to diamonds to gather money. The experience was in Senegal. I heard the call to prayer there while visiting a friend of mine, who was crying for the death of one of his relatives. I asked him why he was crying for her, he said I wished she was alive so she could call upon God to embrace Islam. Out of curiosity, I began to learn what Islam is... He offered me a lecture by Dr. Bilal Phillips explaining the world of jinn, and I believed in their existence even before leaving London, which made me believe the Quran is from God .

"Education is the key to knowledge ".

The journey of Yusuf Chambers and many others who entered Islam, but we will talk in the present time about what will shock you today is the Islam of young Andrew Tete - the curtain was lifted and I found that he would be arrested in any case if he embraced Islam. Michael Jackson the singer embraced Islam and was influential over the youth of the world, so his fate was that charges of sexual harassment were fabricated against him in Europe, and some countries registered a case of rape every 7 minutes, so there is no law to stop this evil, this bankruptcy of feelings .

Who stands behind changing the world and exposing plans to destroy humanity and control people, no, they fabricated charges against him. In the past, fabrication was done with some wicked planning by provoking those around you against you to make you an outcast, like what was done with Dr. Mustafa Mahmoud, by doubting his mentality, religion and with the great opening and knowledge of Islam as we mentioned earlier and manufacturing the Islamophobia phobia, they turned to criminalizing harassers. Now all humans can access pornography on the Internet and date whoever they want with money and exploitation, and you do not find Western governments fighting this discourse, but if they want to get rid of you, this will be the loophole they can imprison you in, even though you were imprisoned beforehand without bars. I spoke about this in my book *The Age of Slavery* .

A questioner may ask: where is justice, I was not a Muslim and was raised by non-Muslim parents, and the hadith "Every child is born on the Instinct (in a pure, natural state), then his parents make him a Jew or a Christian or a Polytheist..." explains that man is born on the Instinct, which is Islam, and his parents change his Instinct according to their religion they adhere to, according to the education he received and according to the society that instilled them with religion, traditions and beliefs. If the child dies before reaching the age of maturity, he is in

Paradise, whatever his religion, because my Lord is Just and does not wrong anyone. But if he reaches maturity, he must embrace Islam. A questioner may ask: why does God punish him if Islam did not reach him? If it reached him, proof was established against him. If it did not reach him, this is in God's knowledge, and all is by God's knowledge. The reasoning for the one Islam reaches is clear and evident - that he does not want the truth, proof is established in full. In our positive laws, a child is not held accountable like an adult, so God is most deserving and Fairer than us.

From manufacturing phobias to manufacturing aragoz or as some call it aragoz, and others call it puppets. It is a Turkish word meaning "black-eyed," referring to the gloomy outlook on life. Qara means black and goz means eye. Some people believe the term aragoz refers to a clown, but not for jesting or gloomy outlook. The world began honoring clowns and deviants among those who view the world with a gloomy outlook to achieve the goals of the conspiracy makers of Satanic plots to destroy humanity, as if it was the new covenant of the devil and rebels of this era .

The thinking of the clown has been adopted by all classes of society, from politicians to public. Even worse, some clowns came to lead some countries into wars they have nothing to do with, following an identity far from the region they are in, and become a proxy tool of war to achieve the goals of others and destroy the environment they belong to .The theory of " the people who has eaten the white bull every day" was taught to me by my father, may God have mercy on him, and I studied it in primary school, and some clowns still apply the theory of the bull that does not learn .

Lack of identity is lack of power and personality, and showing subservience to the stronger. Imam Ahmad, may God have mercy on him, narrated with a sound chain of narrators from Ibn Abbas that the Prophet, peace and blessings of God be upon

him, said in a lengthy hadith: "Whoever resembles a people is one of them." Here there is no benefit, but rather imitation that is specific to them and became part of their particular dress.

Peoples have sought to establish systems that help them survive throughout history. In the early Renaissance between the 15th and 16th centuries AD, the capitalist system emerged as a type of economic and social systems in which all or most means of production are privately owned capital, where capital along with commodity prices in the free market determines .

Then the modern communist system was established by the German philosopher Karl Marx in the mid-eighteenth century text, which is an economic system in which ownership is restricted to the state, whose goal is to achieve social equality through economic equality, which is considered an ideal social and economic situation that states work for .

At the end of the 18th century, the socialist system emerged, which is an economic system in which public property or means of production are subject to the state and the state has primacy in operating them. Most capitalist states have combined socialism and capitalism at the same time .

The difference in ideology is that the capitalist system is based on maximizing profit by all available and possible means, where their philosophy is based on letting conditions run naturally without any external intervention

The ideology of the communist system is based on abilities and needs, while the ideology of the socialist system depends on the basis of capabilities and contribution. In terms of economic planning in capitalist countries, it is according to existing businesses in free markets, while in communism and socialism, economic planning is through the central government .

In terms of the differences in ownership of economic resources, capitalism encourages private ownership of resources and property with little intervention by the government and perhaps no intervention. As for the communist system, most economic resources are considered public property and thus subject to government control in a way that individuals do not have any type of personal property. In socialism, individuals have the right to personal property, but at the same time all industrial and productive capabilities are owned by the state.

The differences in terms of the social welfare system: in the capitalist system, it is only for individuals who own wealth to pay for their services, while in the communist system, comprehensive social welfare is supported on a wide scale with a focus on public health and education. In the socialist system, there is no discrimination - the state allocates welfare for every individual in it.

Here, the differences in terms of class distinction are clear: in the capitalist system, their status in the state is measured through the material wealth they own. In the communist system, class is abolished, meaning there is no factor earning more than other workers. In the socialist system, classes exist but at the same time the differences between them are greatly reduced to the extent that some people may earn more than others.

Trillionaire Dan Pena says: "Go to Saudi Arabia if you want to become obscenely wealthy - that's where billionaires are made." This indicates that the ambitious vision of Crown Prince Mohammed bin Salman is achieving its aspirations to make the Kingdom of Saudi Arabia a leading economic power in the world, where the first digital city in the world will be in Neom, and the largest port in the Middle East is the Port of Jazan, which has a promising future. Based on my humble predictions,

the largest airport and largest port in the Middle East will be the Jizan Economic City. And the most beautiful capital in the Middle East is Riyadh. Whoever does not have an economic connection with the city of Riyadh will be deprived of effective economic power and influence .

As Crown Prince Mohammed bin Salman's vision also seeks to achieve individual welfare and develop the general quality of life, this can only come through diligent work. This was mentioned because the world has begun to open up to others, and true Islam will have a wider and stronger influence as the world gets to know the Gulf and Riyadh in particular, and we are surprised by the development, modernization and liberality of the tolerant Islamic religion and its antiquity.

Let us now turn to the meaning of right and left in politics. It is a concise way to describe the political ideas, beliefs and ideological positions of politicians, movements and various political parties. In general, the right focuses on concepts such as authority, hierarchy, order, duty, tradition and nationalism. The right symbolizes conservative forces that reject changing the political and social system and work to maintain the prevailing situation .

Meanwhile, the left focuses on ideas such as freedom, equality, fraternity, rights, progress and reform. The left symbolizes forces calling for changing the political and social reality. This term emerged during the French Revolution in 1789 AD when members of the National Assembly split into supporters of religion and the king, who sat on his right, and supporters of the revolution on his left. Hence the name of the right wing was taken, and the name of the left wing. I mentioned this because thinking humans who use their minds will search for the true religion and feel reassured by it.

We now come to the dangerous subject of manipulating and enslaving minds, which has been used in all aspects of life - political, economic like marketing, and many social aspects for indoctrination, assimilation and signing - not just on paper but their signing to facilitate accountability, as was done with Andrew Tate or assassination of influential humans to avoid drift and destruction of directed plans for the flock, and misleading people about facts. Straying is the only way to make the world obedient as it wanders in a vortex of ongoing confusion and fabrication of illusion after illusion.

The art of manipulation makes decision-making very difficult, as your beliefs, concepts and orientations have been manipulated and placed on the wrong path without realizing there is a tangible danger that is easy to deal with. However, the non-material aspects are what are affected in a terrifying way, and I will present examples of this:

-1Statistics: Putting statistics in front of you about a particular subject that make you believe them, then think according to them, then they become constants that are difficult to uproot or change your thinking about them .

-2Repetition: Repetition creates habit and brainwashes.

-3Emotional manipulation: Such as creating fake or misleading news in a way that the informed does not understand and the ignorant is directed as they want, like what a news channel wants, for example. Have you ever heard a news channel say it has false news and even if it existed, no one would follow it because humans love seeking truth. Each of us has emotional vulnerabilities that can be exploited.

-4Using deprivation: For example, if you were hungry and entered a supermarket just to buy a specific item, say milk, you

will not just buy milk but also chocolate and things you did not want. Another example is an advertisement for a delicious burger showing an attractive image of the burger along with tasty fried potatoes and the most commonly used drink, which makes you want to order the meal in the future when you reach that restaurant promoting it. Do you know why the milk fridge is far away and not opposite so they can market the rest of the items in the supermarket? This is a refined marketing art that is studied. Deprivation has a very big school that is used in many fields that will shock you with the strength of its influence .

-5Self-destruction: Making you seem crazy so no one believes you, by destroying the person's self-confidence and then their confidence in others and others' confidence in them, then making them ineffective and trying to involve them in errors to prove they are not worthy of respect. This is what was done with Andrew Tate to deprive him of his popularity, as he was the living example for me .

You have freedom of choice as long as you walk the footsteps outlined for you, but if you know the truth, your freedom will be taken away. Many in life chose to be fools to protect those they love.

-6Isolation: To influence someone, they must be isolated from the environment they live in so you can control them. Now it has become easier than before with the terrifying technology that has easily isolated people through the terrifying attachment to the internet to destroy the pleasure of life by giving you everything you search for and distracting you from the goals you want .

-7Explicit harassment: Indirect and direct intimidation and everything that is explicit and clear.

Like The Matrix, the matrix exists in one way or another for manipulation and confusion for political, social or economic purposes. I mentioned this so we can recognize how our minds are manipulated as the deep state in the world wants, and Satan and his servants are still trying to mislead humanity from worshipping creation to rejecting religions and complete atheism. I may touch upon The Matrix filmmakers Larry and Andy Wachowski by succumbing to Satan's desire, who turned two women into Lana and Lilly Wachowski when they changed their gender from male to female, as if they did not choose the red pill or the blue pill, but the black one, which is direct worship of Satan

In life, there are things you are given the ability to choose and things imposed upon you. In Islam there are solutions for all variables, as it is the religion of original instinct and correct belief. The problem is that all religions believe their religion is correct. However, the good news of the religion that regulates your life and the lives of those around you and preserves their rights is closest to reason. God has distinguished people to distinguish the corrupt from the good and hold them accountable for it .

The sound person loves adhering to the limits of religion and commits to its boundaries. I have not mentioned Andrew Tate here except because he says he loves the strong, explicit religion that protects your rights and the rights of your prophet. Among Muslims, you cannot curse or mock the prophet due to the sanctity of that, as he discerned with his mind, may God preserve him, and guide his steps and honor him with peace and honor Islam through him. It is incumbent upon the Muslim to supplicate for his Muslim brother, as the Messenger, may God's prayers and peace be upon him, said: "This matter will reach what the night and day reach, and God will not leave a house of mud or hair but He will bring them into this religion, through the honor of the honorable or the humiliation of the humiliated -

honor by which God honors Islam, and humiliation by which God humiliates disbelief." O God, make us among those through whom You honored Islam and raised the flag of Tawheed .

The poisons of intellectual and fighting virtue have become clear as they have only prohibited the permitted and permitted the prohibited. Depravity has become a personal freedom and changing God's creation has become permissible and real human rights have become alleged rights calling for deterioration and moral bankruptcy serving those who serve Satan, and it pleases me when Andrew Tate wore a T-shirt written on it: "Resist mental slavery", because the world will wake up to the reality of Islam and that it is the true, final religion for humanity .

O advocates of freedom, where are human rights and animal rights with you better than human rights? Until you have allowed bestiality and made animals inherit, damn your minds that indicate profound ignorance. Nations have been raped and occupied, and here is a living example of the occupied Palestinian state from the Zionist entity. Here you find the clear matrix game and manipulation of minds. Note that non-Muslim media portray that they are the rapists while killing Palestinian women and children day and night and building settlements, and we only find condemnation from some countries of the world, and if it was a Western country, the world would burn and not calm down, and there is no country in the world that has denied or taken a real stance except Islamic countries. For the weak, there are no rights in this world, and the Palestinian issue remains the obsession of Muslims around the world, as Islam is the source of peace, not as phobia Islam portrayed it to be the advocates of wars and killings, but truth must appear one day, and the world will know what true Islam is - the religion of humanity, this great final religion for humanity .

The matrix still wants to overthrow all religions and plant atheism and deify humans by searching for themselves, and the idea is satanic because Satan's goal is to destroy man as he is the real enemy of the children of Adam. Humans must know the truth themselves because no one will teach you except what they want, not what you want. Man is knowledgeable by nature, and if left would find his way and know his Lord .

Here is the shock for you to know what Hitler the dictator said about Jews: "If you want to know the basis for spreading depravity in any society in the world, know that Jews are behind it and owning the media of social communication".

Enter now as you read this book on any search engine and type indecent words about Israeli girls, you will not find anything in the search except about female soldiers, and you will find scantily clad girls at the top of the search and calls for depravity, and you find all the world's females except Israeli girls.

Regarding discovering the truth, the IMF in Britain and France is owned by one family who controls the fate of the whole world by lending to whom they please and preventing whom they please. I hate racism and discrimination between world countries in general, but to show you... Ask yourself why the Quran forbade eating pork, the simple answer is that God created it to clean dirt. How do you eat an animal that eats animal waste to know something? Jews also do not eat pork, so do not ask me as I am a Muslim, go and ask Jews why they do not eat pork, perhaps some people will be more convinced by them.

Here is a stand with oneself, a person must be cultured but unfortunately many relate culture to knowledge alone. Culture is much more beautiful than its apparent meaning. Culture means knowing your father is Adam and your mother is Eve and humans are brothers; respect different cultures and religions and

do not transgress on their rights. Human brotherhood is respecting the Creator who has honored man over all creatures, and no one has the right to diminish your humanity. The cultured person knows he has a white brother, a black brother and a brown brother and does not discriminate in treatment or respect and protects their rights. Division has been used to stir empty minds and realize interests unrelated to humanity. Culture is most beautiful when adorned with knowledge .

How does one system fight another system? To create war between them, sectarian strife must be sown between them. If they have different religions, you begin by planting the problem as being for religion. If they are of one religion, you begin by sowing divisions between sects to ensure igniting it. If they are of one religion and sect, you descend to tribes or families. So division is ensured from mourners. Thus, you find states fighting others due to some of these reasons, and their leaders know it is for power, not for the religion or belief implanted to stir up the popular base to instill an illusory spirit of enlistment that only brings destruction to humanity. The German example of Hitler, who despised his nation and they obeyed him, addressed them saying: "You Nazis possess the blue blood, you are God's chosen people and the rest of humans are but your slaves, and we must reclaim our right to ravage the world..." And they acted based on this, and consider those whose minds and advantage have dissociated from their humanity. The German is my brother in humanity as is the Russian, Chinese, American, Australian, Mozambican, Kenyan, Brazilian, Scottish, Indian, Arab, Muslim, Hindu - all religions and all countries. Names are only for identification, not for discrimination. Be assured discrimination was not created for arousing ignorant disputes. We live in a world advanced in machines but not in human development or killing his human brother.

I am the author of the book and I seek refuge in Allah from arrogance, for I love all countries and all nationalities, and I am

passionate about peace. I do not hate anyone from the human races, nor even Jews in my capacity as a Muslim. So this is the first question directed to me. But I hate Zionist Jews who occupy land that is not theirs and violate its sanctity and the sanctity of its people. If the rights of our Palestinian brothers were returned and sovereignty given back to them, and the alleged occupied Israeli state handed over to the Palestinians, I would not hate them. Here I hate them not because I am Muslim but because I am a human seeing a people oppressed, whose land is occupied, and the world watches. Where is the entrenchment of borders established by the British state, which all countries committed to except the Zionist occupation? Where are human rights, O world countries ?

This was the worst example, not the last, as exploitation of humanity is disgraceful. Humans love peace and there is no peace as long as Satan exists, for he is the one who instigates evil in us so we kill each other and wrong each other.

This message is to my brothers in humanity from all countries in all colors, sects and religions:

1. Any religion that allows killing the human soul makes this religion nullified. In Islam, the world does not balance a mosquito wing, and in its meaning according to Tabari in The Small Book about Anas raising it: "Whoever harms a Muslim unjustly is as if he demolished the house of God".
2. Any religion that allows taking others' rights is not a religion.
3. Any religion that incites contempt or racism is not a religion .
4. Any religion that does not protect your rights whether you are strong or weak is an invalid religion.

5. Any religion that makes you worship any creature is not a religion:

A. Where is your mind, my dear brother, worshiping a tree?

B. Where is your mind, my brother, worshiping an animal?

C. Where is your mind, my brother, worshiping a god that was killed? This is a weak god undeserving of worship .

D. Where is your mind, my brother, worshiping the sun, moon or stars?

E. Where is your mind, my brother, worshiping a human like yourself who will die?

Ask yourself, my human brother, where is the true Lord, and try to search for Him sincerely and you will find Him, for man is intelligent by nature and will know his Lord if he wishes.

The two things that most destroyed humanity over the ages are:

1. Raping minds
2. Politicizing religions or religiousizing politics

Peoples have sought to establish systems that help them survive throughout history. In the early Renaissance between the 15th and 16th centuries AD, the capitalist system emerged as a type of economic and social systems in which all or most means of

production are privately owned capital, where capital along with commodity prices in the free market determines.

Then the modern communist system was established by the German philosopher Karl Marx in the mid-eighteenth century text, which is an economic system in which ownership is restricted to the state, whose goal is to achieve social equality through economic equality, which is considered an ideal social and economic situation that states work for .

At the end of the 18th century, the socialist system emerged, which is an economic system in which public property or means of production are subject to the state and the state has primacy in operating them .

Most capitalist states have combined socialism and capitalism at the same time.

The difference in ideology is that the capitalist system is based on maximizing profit by all available and possible means, where their philosophy is based on letting conditions run naturally without any external intervention .

Imagine if all the world's curricula taught one curriculum and one thought after another heavenly religion, which is Islam, peace would reign over all. But some people would lose dominance because they are of another religion - this is what has distorted Islam and strife emerged during the time of the Messenger, may God's prayers and peace be upon him, and increased after his death. Some of the Rightly Guided Caliphs were assassinated .

The same human nature loves chaos. If taught correctly as revealed to Muhammad, may God's prayers and peace be upon

him, our condition would not be as it is. Some countries in the world learned to live like free humans after a long series of wars made them know peace .

In conclusion, your religion serves your faith after death, not contempt of those who differ with you, and does not mean their differing with you makes you deprive them of their rights and humanity. Islam means peace with humans and the self and life. I wanted in this book to clarify what was misguided about Islam from outside by those who took it as a means to achieve purposes other than humanity's welfare .

How beautiful if the world lives in permanent peace, and love and happiness prevail in all countries of the world. Religions and beliefs must be respected and their sanctity and sanctity of their followers preserved. A law must criminalize any desecration of or mockery of religions or addressing them negatively. All wars in the world must end and we must love each other.

This was from the madness of the orchestra conductor, maestro who loves the Kingdom of Saudi Arabia, the Gulf countries, Arab and Islamic countries and all peace-loving countries of the world .
